

As part of the Government funding for school, there is an allocation of money called “Pupil Premium” (PPG). It is designed to reach out to pupils who need it the most and to tackle disadvantages for these pupils. This money is used to support children who are eligible for free school meals, are looked after and/ or have parents who are employed in the armed forces.

Scott Primary School is committed to working towards equality of opportunity for all children regardless of age, ability, gender, race and social circumstances. All pupils are of equal value and have the same right to take part in the varied activities and opportunities wherever possible. All opportunities for learning should be offered in a way which allows all children access and the ability to progress at their stage of understanding.

Each school that receives Pupil Premium funding is allowed to make the decision about how the money is spent. Here at Scott Primary School we understand what makes a difference to children’s attainment across the school and that high standards and quality in teaching is essential to the understanding of how each child learns.

In the financial year 2018/2019, the school was allocated £117,480 in Pupil Premium funding. We currently have 468 children on roll and receive PPG funding for 89 children. (September 2018).

Measuring the impact of PPG spending—cont

Children who have received First Class at number and Plus 1 interventions have all made better than expected progress given their starting points. They have increased their maths age as evidenced by the Sandwell Assessments.

The Family Support Worker has involved and engaged the FSM families with activities and training and this has improved the attendance of these children. There is better attendance at our weekly coffee afternoons. This has led to an increase in the number of children completing homework as parents are now able to support them. Engagement of parents has increased through workshops such as a Triple P.

The children who have accessed the nurture group have all made improvements in their social and emotional development as evidenced by the Boxall Profile results

The children who have accessed Rapid Reading have all made better than expected progress from their starting points.

The children who have attended lunchtime clubs have improved their social skills and their resilience levels have increased.

Attendance across the whole school is up to 96.8% -. We have narrowed the gap as Pupil Premium children are now only 1.7% lower.
