

Early Years Foundation Stage

Addition:

Maths for young children should be meaningful. Where possible, concepts should be taught in the context of real life.

Foundation Stage

1. Have an understanding of what "more" means and be able to say what is one more than a given number.
2. Children begin to combine groups of objects or pictures and use concrete apparatus.
3. Solve simple problems using fingers and introduce Numicon shapes when appropriate.

$$2 + 5 = 7$$

4. Children make a record in pictures, words, Numicon shapes or symbols of addition activities already carried out.

$$\begin{array}{c} \text{🍓} \text{🍓} \\ 2 \end{array} + \begin{array}{c} \text{🍓} \text{🍓} \\ 2 \end{array} = 4$$

$$5 + 1 = 6$$

5. Children are encouraged to read number sentences aloud in different ways:

e.g. "Three add two equals 5" "Four plus 3 makes 7"

6. Construct number sentences verbally, or by using cards to go with practical activities.
7. Number lines can be used alongside practical apparatus to solve addition calculations and word problems. Children "jump" along the number line to "count on".

$$3 + 1 = 4$$

Key Vocabulary: Games and songs can be a useful way to begin using the vocabulary involved in addition. **add, more, plus, makes, total, altogether, score, double, one more, two more, ten more** **how many more to make...? how many more is ... than ...?**

Key skills for addition in Foundation Stage:

- Select the correct numeral to represent 1 to 5, then 1 to 10 objects.
- Count an irregular arrangement of up to ten objects.
- Estimate how many objects they can see and check by counting them.
- Use the language of 'more' and 'fewer' to compare two sets of objects.
- Find the total number of items in two groups by counting all of them.
- Say the number that is one more than a given number.
- Find one more from a group of up to five objects, then ten objects.
- In practical activities and discussion, begin to use the vocabulary involved in addition
- Record, using marks that they can interpret and explain.
- Begin to identify own mathematical problems based on own interests and fascinations

Subtraction:

Foundation Stage

1. Have an understanding of what "less" means and be able to say what is one less than a given number.
2. Children begin to use objects, pictures and concrete apparatus to relate subtraction to taking away and counting how many objects are left.
3. Solve simple problems using fingers and introduce Numicon where appropriate.

4. Children make a record in pictures, words, Numicon shapes or symbols of subtraction activities already carried out.

10 take away 5 leaves 5

5. Children are encouraged to read number sentences aloud in different ways
e.g. **"Five subtract one leaves four"** **"Six take away 3 equals 3"**
6. Construct number sentences verbally or using cards to go with practical activities.
7. Number lines can be used alongside practical apparatus to solve subtraction calculations and word problems "jump" back to "count down" the number line.

Key Vocabulary: Games and songs can be a useful way to begin using the vocabulary involved in subtraction: e.g. Five Little Men in a Flying Saucer, Ten Green Bottles, Five Currant Buns

take, take away, leave, subtract, minus, equals, number sentence, count back, one less, two less, ten less how many are left / left over? how many have gone? how many fewer is .. than ..?

Key skills for subtraction in Foundation Stage:

- Select the correct numeral to represent 1 to 5, then 1 to 10 objects.
- Count an irregular arrangement of up to ten objects.
- Estimate how many objects they can see and check by counting them.
- Use the language of 'more' and 'fewer' to compare two sets of objects.
- Say the number that is one less than a given number.
- Find one less from a group of up to five objects, then ten objects.
- In practical activities and discussion, begin to use the vocabulary involved in subtraction
- Record, using marks that they can interpret and explain.
- Begin to identify own mathematical problems based on own interests and fascinations

Multiplication:

Foundation Stage

The link between addition and multiplication can be introduced through doubling and reinforced through repeated addition of the same number.

1. Children begin with mostly pictorial representations.

How many groups of 2 are there? 3 groups of 2 = 6

2. Real equipment to count in repeated groups of the same size.

life contexts and use of practical

How many wheels are there altogether?

How much money do I have?

3. Count in twos, fives and tens, both aloud and with objects, such as Numicon or other concrete apparatus.

2, 4, 6, 8, 10, 12

4. Children are encouraged to read number sentences aloud in different ways
e.g. "Five groups of two makes ten" "Three lots of two makes six"

5. Children are given multiplication problems set in a real life context and are encouraged to visualise the problem.

e.g. "How many fingers on two hands?" "How many sides on three triangles?"

"How many legs on four ducks?"

Key Vocabulary: lots of, groups of, times, repeated addition, double, combine, twos, fives, tens

Key skills for multiplication in Foundation Stage:

- Select the correct numeral to represent 1 to 5, then 1 to 10 objects.
- Count an irregular arrangement of up to ten objects.
- Estimate how many objects they can see and check by counting them.
- Find the total number of items in two groups by counting all of them.
- Record, using marks that they can interpret and explain.
- Begin to identify own mathematical problems based on own interests and fascinations.

Division:

Foundation Stage

1. Division can be introduced through halving or sharing an equal amount into 2 groups.

2. Children begin with mostly life contexts:

pictorial representations linked to real

Grouping Model

Mum has 6 socks. She grouped them into pairs. How many pairs did she make?

Sharing Model

I have 10 sweets. I want to share them with my friend. How many will we have each?

Children need to see and hear representations of division as both grouping and sharing.

3. Children have a go at recording the calculation that has been carried out:
e.g. by drawing pictures in groups or by arranging concrete apparatus into groups.

12 shared equally by 3 is 4

Key Vocabulary: halve, share, share equally, one each, two each, three each, group in pairs / threes / tens, equal groups of, in equal parts, left, left over

Key skills for division in Foundation Stage:

- Select the correct numeral to represent 1 to 5, then 1 to 10 objects.
- Count an irregular arrangement of up to ten objects.
- Estimate how many objects they can see and check by counting them.
- Record, using marks that they can interpret and explain.
- Begin to identify own mathematical problems based on own interests and fascinations.
